Astronomy

In learning about astronomy, Scouts study how activities in space affect our own planet and bear witness to the wonders of the night sky: the nebulae, or giant clouds of gas and dust where new stars are born; old stars dying and exploding; meteor showers and shooting stars; the moon, planets, and a dazzling array of stars.

Automotive Maintenance

Modern automobiles are important to many aspects of American life. Those who service automobiles must understand each principle, and how these principles interact to provide smooth, efficient performance. Owners of cars also benefit by understanding how their vehicles operate. This enables them to understand why certain periodic maintenance is required to keep their vehicles in tip-top shape.

Aviation

For most of history, people have dreamed of flying, imagining how it would feel to soar through the sky like an eagle or hover in midair like a hummingbird, to float on unseen currents, free of Earth's constant tug, able to travel great distances and to rise above any obstacle. Today, through aviation, we can not only join the birds but also fly farther, faster, and higher than they ever could.

Maximum number of participants: 16

Prerequisites: #2f; #4a; #4b; #4c; #5

NOTE: Please Choose one from 4a, 4b, or 4c

Period 1 09:00-10:00 AM
Period 11 04:00-05:00 PM
Period 3 10:00-11:00 AM

Basketry

Basketry is a handy skill for a Scout. A basket can be a sturdy companion on campouts, carrying clothes snugly and efficiently, holding potatoes and corn for roasting over a campfire, or carrying the day's fishing catch back to camp for dinner. Baskets and basket-weaving projects also make great gifts for family and friends.

When he founded the Scouting movement in the early 1900s, Robert Baden-Powell encouraged every Scout to learn the art of living out-of-doors. He believed a young person able to take care of himself while camping would have the confidence to meet life's other challenges, too.

Fishing

In Scouting for Boys, Baden-Powell offers this advice: "Every Scout ought to be able to fish in order to get food for himself. A tenderfoot [beginner] who starved on the bank of a river full of fish would look very silly, yet it might happen to one who had never learned to catch fish."

Maximum number of participants: 16

Prerequisites: #7

NOTE: The fishing merit badges often take extra time to complete due to the actual catching of fish requirements. We have spoken to the fish and asked for their cooperation.

Snorkeling BSA

Requirements

- 1) Before doing other requirements, successfully complete the BSA swimmer test: Jump feetfirst into water over the head in depth, level off, and begin swimming. Swim 75 yards in a strong manner using one or more of the following strokes: sidestroke, breaststroke, trudgen, or crawl; then swim 25 yards using an easy, resting backstroke. The 100 yards must be completed in one swim without stops and must include at least one sharp turn. After completing the swim, rest by floating.
- 2) Discuss the importance of using the buddy system at all times while snorkeling and list duties of a buddy, beginning with equipment checks.
- 3) Explain the function, fit, and selection of mask, fins, and snorkel. Discuss the use of inflatable flotation vests and PFDs when snorkeling in open water.
- 4) In confined, shallow water (about waist deep), demonstrate use of mask and snorkel:
 - 1) Show how to prevent the mask from fogging and how to equalize pressure in mask, ears, and sinus cavities. With your head underwater, flood the mask, observe the effect on your vision, surface, and drain the water from the mask.
 - 2) With your face in the water, breathe through the snorkel. Then submerge, surface, clear water from the snorkel, and resume free breathing without removing the snorkel from your mouth.
- 5) In confined, shallow water, demonstrate the use of swim fins: Do first using only fins, and then repeat with a mask and snorkel.
 - 1) Fit and adjust fins to feet.
 - 2) Walk with fins as if entering from a beach.
 - 3) Swim at the surface (10 yards) and underwater (three yards) using the flutter kick.
 - 4) Control direction without using hands while swimming with fins at the surface and underwater.
- 6) In confined, deep water (six to 12 feet), demonstrate:
 - 1) Proper techniques for entering and exiting the water with snorkeling equipment from a dock or boat.
 - 2) Headfirst and feetfirst surface dives, including proper body position for safe ascent and descent.

- 9) Demonstrate basic survival skills:
 - 1) Float facedown for five minutes while breathing through a snorkel with a minimum of movement.
 - 2) Demonstrate survival floating for five minutes without use of a snorkel.
 - 3) Using fins, show how to tow an exhausted or unconscious buddy to safety.

Explain environmental factors that affect snorkeling and discuss special precautions needed for oceans, streams, and lakes.
- 11) Explain pressure, buoyancy, and submerged optics and acoustics related to snorkel swimming and diving.
- 12) Discuss the effects of submersion on the body and how to handle potentially dangerous situations:
 - 1) What is hyperventilation and how is it avoided'
 - 2) What are the symptoms and consequences of hypothermia'
 - 3) Why is CPR training recommended for those participating in swimming and snorkeling activities'
